

# Erratum: Multiplication of vectors and structure of 3D Euclidean space

by Miroslav Josipović

**Key words:** *errata, functions of multivectors, geometric algebra, logarithm*

There is an incorrect calculation on the **page 49 (Examples)**, the correct calculation is

$$X = \exp(-j\pi u_-) = \exp(0)u_+ + \exp(-j\pi)u_- = u_+ - u_- = e_1.$$
